

The plot displays a rectangular region of interest in the sky, defined by Right Ascension (RA) and Declination (DEC). The x-axis (RA) ranges from 0h05m to 50h, and the y-axis (DEC) ranges from 00m to 50m. A green shaded area represents the 'fully inside' region, while a red shaded area represents the 'crosses the border' region. The green region is a large rectangle centered around 23h00m RA and 23m DEC. The red region is a thin border around the green region.
